

# Introduction to Civil Contingencies and Emergency Management (ICCEM/09)

CCA Consultants is pleased to announce the arrival of its latest training package that is designed to assist Category 1 Responders to raise the awareness of key personnel to the Civil Contingencies Act and Emergency Management.

This one day event has been designed to meet the needs of Local Resilience Forum partners. It introduces staff from across the responder services to the Civil Contingencies Act 2004 and the basics of Incident Command Structures within a multi agency integrated response to emergencies.

The day is delivered by our experienced trainers and supported by current examples from within the UK emergency planning profession. Learning is reinforced with a table top syndicated exercise in the afternoon.
