

Introduction to Emergency Management in the UK (CTEP/09)

CCA Consultants is pleased to offer this training package that is designed to assist those undertaking a career transition and considering a future career in the UK's Emergency Management profession.

This one day event has been designed to meet the needs of those professionals exiting the UK Emergency Services or Military who wish to take their contingency planning and command experiences forward into a second career in the UK's Emergency Management (EM) profession. The Civil Contingencies Act 2004 is the underpinning legislation of the UK EM activity framed as the 'Resilience Programme' and will form the core of the course delivered.

The day is delivered by our experienced trainers and supported by current examples from within the UK emergency management profession.
